Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Detailed Action

1. In claim 1, "judgment " is misspelled.

2.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claims 1, 7 and 9 are rejected under 35 U.S.C. 102(a) as being anticipated by Suzuki.

With respect to claim 1, Suzuki teaches an image processing apparatus, shown by figure 1, comprising: image storage means 38-45 for storing one or more additional images in response to characteristic of an input image; judging means (1st binary processor) for judging the characteristic of the input image; synthesizing means (last 3 lines of the "Solution" for adding an additional image corresponding to the characteristic of said input image (luminance data and data from the binary information table stored in the storage means 38-45 to the input image in accordance with the judgment result of the first binary processor.

With respect to claim 7, Suzuki teaches charging means (binary information table for obtaining a binary amount which is charged to the response of an output signal. See the last four lines of the Solution.

With respect to claim 9, Suzuki teaches charging means (binary information table) for calculating a charge amount in accordance with the characteristic of said input image which is judged by said judging means (the first processor) . Results of the first processor are fed to a second processor which includes the binary information table.

3. Claims Objected

Claims 2-6 are objected to as containing allowable subject matter. The allowable subject matter is found in claim 2 and includes: ".... Wherein said synthesizing means adds said color additional image to said input image when said judging means judges that said input image is the color input image, and also adds said black/white additional image to said input image when said judging means judges that said input image is the black/white image."

Art Unit: 2626

Claims 8 and 10 are objected as containing allowable subject matter.
